

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF
IDAHO

DES-I-CATE®

FOR USE ON ALFALFA

EPA Reg. No. 4581-206

EPA SLN No. ID-870019

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system.

For use on seed crops only - seed from treated fields should be used for planting purposes only. Do not use seed for food, feed or oil purposes.

Heavy stand: use 3/4 to 1 1/4 gallons of DES-I-CATE in 8 to 10 gallons of water per acre and repeat application in 3 to 5 days; or use 2 gallons of DES-I-CATE in 8 to 10 gallons of water per acre in one application.

For ground application: use the same rates of DES-I-CATE per acre, but increase the water to make a total spray of 10-20 gallons per acre.

NOTE: Seed crops should not be sprayed until the seed is mature and the plants have lost moisture normally following the end of the irrigation season. Spraying before the seed has reached maximum dry weight may result in yield reduction. Seed crops are normally ready for combining 5 to 10 days after treatment. For best results combine the seed crop as soon as it is ready for harvest.

KEEP OUT OF REACH OF CHILDREN

DANGER

For Statement of Practical Treatment and other Precautionary Statements, see label attached to container.

All applicable directions, restrictions, and precautions on the EPA-registered labels are to be followed.

NOTE: This label must be in the possession of the user at the time of pesticide application.
